DOJ,

I think your case against Microsoft Corp. was a disgrace to the American Legal System. It seems you allowed a group of businessmen from the likes of Sun Microsystems and AOL, who couldn't compete with Microsoft on the field of software design and customer service, and allowed them a chance in a courtroom to do what they could never have done through any work of their own.

I use all Microsoft products because of their good design and customer service. I think you should point your legal gun somewhere else...and perhaps you should read Greenspan's work entitled: AntiTrust. Found in Ayn Rands collection of works "For the New Intellectual".

Mark MacNeil
